**Routes into STEM Virtual Experience
2023/24**

Virtual Routes into STEM course.

This course will allow students in Yr9 & 10 to recognise the variety of opportunities available to them after taking their GCSEs. It will give them access to key information on different pathways, College, University and a STEM Career.

The course will run during the period 2 October 2023 – 2 August 2024 and students can join anytime and can complete flexibly within this time.

Diverse live interactive sessions will take place throughout the duration of the course, these will be available during school holidays and after school. Students will be able to listen and ask questions to a variety of STEM professionals and student ambassadors. Students will also choose from a range of exciting projects, developed by their University and Industry partners, to work on during the course.

THE LONDON SCHOOL OF ECONOMICS AND POLITICAL SCIENCE ■

Pathways to Banking and Finance: Years 12-13

Pathways to Banking and Finance is a financial access scheme which takes place across two years and supports Year 12 and 13 students who are interested in studying finance or a career in the financial sector.

Students join the scheme at the start of Year 12 and throughout the scheme they will be invited to attend a regular, engaging programme of activities including lectures, seminars, an insight day and university guidance sessions. Students will also have the opportunity to apply for an undergraduate mentor, a residential conference in the summer and for an insight programme at a financial firm.

The Pathways to Banking and Finance scheme is run collaboratively with the Sutton Trust and is supported by Deutsche Bank.

The scheme runs annually. Students take part in activities from the December of Year 12 through to March in Year 13.

The Pathways to Banking and Finance programme will be delivered using a hybrid model in 2023/24. Therefore, this will consist of a variety of both online sessions and in-person events, throughout the course of the programme. This ensures that students benefit from being able to visit our campus and have opportunities to interact with LSE staff and students, whilst maintaining the accessibility that online events provide.

2024 Degree Apprenticeship - Building Surveying MACE LIMITED

Mace offers a wide range of consultancy services and is employed by clients for industry leading expertise, including Building Surveying services whilst studying for the Chartered Surveyor L6 apprenticeship. You will be providing professional advice and recommendations to clients on land, property or construction.

Annual wage

£19,000.00

Apprenticeship level

Degree

Level 6 (Degree with honours)

What will the apprentice be doing?

In Building Surveying, you will play a key role in assisting with the delivery of professional building surveying services, developing working knowledge to inspect building fabric systems for the purposes of asset management reporting and construction project delivery. Some of your main responsibilities will include:

- Assisting with building surveys for various building types for assessment, defect identification and diagnosis and project monitoring
- Contributing to the preparation of reports to meet the client's scopes of services
- Supporting the preparation of reports, specifications and contractual documents to assist with the management of construction projects

What training will the apprentice take and what qualification will the apprentice get at the end?

- Our structured training programme will teach you technical and business skills to help you succeed in your career.
- You will also work towards completing a five-year L6 Chartered Surveyor (Building Surveying) apprenticeship, where you'll achieve a BSc (Hons) Building Surveying degree. We will also support you in gaining professional membership of the Royal Institution of Chartered Surveyors (RICS).

Qualifications

GCSE or equivalent 5 subjects including Maths and English (Grade 4/C) Essential

A Level or equivalent any subjects (Grade 96 UCAS Points)

Essential

Training provider

CITY, UNIVERSITY OF LONDON

MISSILE SYSTEMS

Mechanical Engineering Level 6 Higher Degree Apprenticeship MBDA UK LIMITED

Mechanical Engineering is involved in all aspects of the product life-cycle; from early development and research, through to in service support. This opportunity will give you the foundations on which to build the expertise required to design, make, and test the next generation of missile system hardware.

Annual wage

£18,000.00

What will the apprentice be doing?

This 4 year apprenticeship is structured as follows:

- During your first 2 years you'll benefit from a fixed set of placements, rotating departments to give you a good insight into the basics of Mechanical Engineering and related departments in MBDA.
- Years 3 and 4 you'll get to pick the placements that you would like to do as well as have the option to do an 'external' placement in another function or with a supplier/external agency.
- During your fourth year you'll complete an individual research project with the option for this to be an industry sponsored project in partnership with MBDA.

What training will the apprentice take and what qualification will the apprentice get at the end?

Product design and development engineer (degree) level 6.

Qualifications

GCSE or equivalent English (Grade 4) Essential

GCSE or equivalent Maths (Grade 4) Essential

GCSE or equivalent Science/Technology (all sciences or IT)

(Grade 4) Essential

In addition to, 120 UCAS points achieved through:

3 B's or ABC at A level including Maths AND Physics or Technology or an Engineering subject.

Training provider

You will study towards a BEng (Hons) in Mechanical Engineering degree at The University of Hertfordshire, one day a week with the remainder of your working week putting in to practice everything you're learning in a real life environment via your placements. Course delivery will be a blend of virtual and face to face learning.
